About Manto Machinery

Henan Manto Machinery Equipment Co., Ltd. is a professional manufacturer producing and selling complete production lines for **wood crushers, biomass pellet mills, and charcoal production equipment.**

After **25 years** of vigorous development, we have successfully resolved practical challenges and driven profit growth for **tens of thousands** of clients worldwide. Our equipment is deployed across **more than 50 countries.**

We remain committed to a **people-oriented approach**, providing each customer with the most suitable equipment and services to ensure their production is supported by the highest quality products and solutions.

Our Mission

Empower biomass & wood processing industries worldwide with innovative, durable, and cost-effective solutions.

Our Vision

To be the globally trusted partner for sustainable biomass energy and wood recycling.

Our Promise

Reliable after-sales support, professional line design, and 24/7 technical assistance.

Our Core Expertise

Wood Crushers

Disc chippers, hammer mills,
shredders for every
application

Charcoal Equipment

Carbonization furnaces,
briquetting machines,
complete lines

Biomass Pellet Mills

Ring die & flat die pelletizers
for high-quality fuel

Turnkey Solutions

Full plant design, installation,
and training services

25+

Years of Experience

10,000+

Clients Served

50+

Countries Worldwide

24/7

Technical Support

“ We don't just sell machines — we build long-term partnerships that help our customers grow. ”

Our Journey & Values

2001

Founded in Zhengzhou, China, with a focus on wood processing machinery.

2008

Expanded product line to include biomass pellet mills & carbonization equipment.

2013

Achieved CE certification, began exporting to Europe & Southeast Asia.

2018

Launched complete turnkey plant solutions for charcoal & biomass production.

2024

Served 10,000+ clients across 50+ countries, solidifying global presence.

People-First

Customers & employees at
the heart

Quality

Durable, high-performance
equipment

Innovation

Continuous improvement

Sustainability

Green solutions for
renewable energy
